## Anticoagulants—Cont'd

use of, in surgery of aneurysms and arteriovenous fistulas, with particular reference to Dicumarol, 301\*

Aorta, abdominal, ligation and division of, for metallic embolus from heart, 950\*  
dissecting aneurysms of (Schlichter et al.) (Proc.), 479

effect of blood cholesterol disorders on coronary arteries and (Morrison and Gonzales) (Proc.), 473

embolism at bifurcation of (Morest and Rubin), 277

high ventricular septal defect with slight dextroposition of, (Eisenmenger type), which presented clinical features of patent ductus arteriosus (Hurst and Schemm), 144

Aortic bifurcation, syndrome of thrombotic obliteration of, 951\*

insufficiency, healed dissecting aneurysm of aorta with signs of, 452\*

sinus, congenital aneurysm of, 305\*

Aortography, thoracic, 948\*

Apnea, transitory, in man induced by breathing mixture rich in oxygen during state of anoxemia, 949\*

Arterial blood, rate of disappearance of dye T-1824 from, 633\*

disease, obliterating, exercise test in, 151\*

of upper extremity following severe urticaria, 151\*

sympathectomy for; indications and contraindications, 635\*

studies on relationship of diet and renal insufficiency to (Holman) (Proc.), 476

hypertension, cerebral vascular changes in, (Scheinker) (Proc.), 470

obstruction, pulmonary, acute, experimental study of, with special reference to precordial electrocardiogram (Flasher et al.), 882

occlusion, mesenteric, superior,—recovery without resection, 787\*

oxygen saturation at rest and during exercise in congenital heart disease, continuous observations of (Montgomery, Jr., et al.), 668

pressure, effect on (I); circulatory responses to spinal and caudal anesthesia in hypertension: relation to effect of sympathectomy (Taylor et al.), 221

Arteries, coronary, aneurysm of (Scott), 403

nonatheromatous lesions of, 303\*

of dog, reactions of, following injury by allylamine (Waters and McAllister) (Proc.), 475

Arteriography of limbs, 154\*

Arteriosclerosis, clinical diagnosis of (Davis) (Proc.), 473

with particular reference to use of roentgen ray (Zeman and Schenck) (Proc.), 480

evaluation of thyroid function in older individuals with various degrees of (Kountz et al.), 475

further studies on production of, in dogs by cholesterol and thiouracil feeding (Steiner et al.) (Proc.), 477

## Arteriosclerosis—Cont'd

new experiments in (Altschul) (Proc.), 480  
obliterans rationale, sympathectomy for, and results (Blain, III, et al.) (Proc.), 477

peripheral, lumbar ganglionectomy in (Gerber et al.) (Proc.), 478

spontaneously occurring, of chicken, effect of low-fat diet on (Horlick et al.) (Proc.), 472

Arteriovenous aneurysm, pulmonary, 301\*

fistula, common carotid-internal jugular, cerebral hemorrhage following repair of, 789\*

Artery disease, coronary, in men eighteen to thirty-nine years of age (Yater et al.), 334, 481, 683

pressure, pulmonary, influence of short periods of induced acute anoxia upon, in man, 152\*

Ascites, failure of peritoneal-button operation for, report of two cases, 313\*

Atheromatous plaques, development, of following production of intimal atherosclerosis by intravenous injection of colloidal cholesterol into rabbits (Bevins et al.) (Proc.), 473

Atherosclerosis, aortic, absorption of, by choline feeding (Morrison and Rossi) (Proc.), 479

cholesterol, experimental, inhibition of, by alloxan diabetes in rabbit (Duff and McMillan) (Proc.), 469

experimental, prevention of, by choline feedings (Morrison and Rossi) (Proc.), 479

intimal, development of atheromatous plaques following production of, by intravenous injections of colloidal cholesterol into rabbits (Bevins et al.) (Proc.), 473

relationship of chronic alcoholism to, 315\*

Atresia, tricuspid, congenital, associated with interauricular septal defects (Miale et al.), 438

Atrial infarction with diagnostic electrocardiographic findings (Hellerstein), 422

septal defect, differentiation of patent ductus arteriosus and, 634\*

Atrioventricular block complete, in diphtheritic myocarditis, 786\*

canal, incomplete division of, with patent interatrial foramen primum (persistent common atrioventricular ostium) (Rogers and Edwards), 28

excitation, anomalous, intermittent, (Wolff-Parkinson-White syndrome) septal infarction with complete heart block and; histologic demonstration of right lateral bundle (Levine and Burge, Jr.), 431

Auricle, kymographic studies of function of, 949\*

Auricular fibrillation, chronic, 314\*

pre-excitation and, 461\*

flutter and auricular fibrillation, experimental studies on (Scherf et al.), 241

clinical, proof of its occurrence; discussion of circus movement, 635\*

- Auriculoventricular heart block, mechanism of irregular sinus rhythm in (Roth and Kisch), 257  
 A-V block, partial, and duodenal ulcer, 948\*  
 Axis, anatomical, longitudinal, of ventricles, can it be estimated from electrocardiogram? (Hyman et al.), 906  
   deviation, effect of posture upon, in human bundle branch block (Jones and Feil), 739  
   in human bundle branch block (Jones and Feil), 98

## B

- Bacteremia following dental extraction, effect of penicillin on, 302\*  
 Bacterial endocarditis (Cecil et al.), 934  
   subacute, hyperthermia caused by penicillin-heparin in treatment of, 790\*  
   penicillin therapy in, 303\*  
   treatment of, 453\*  
   true aneurysms of mitral valve in, 304\*  
 Barbitalized dogs, mixing of cells, plasma, and dye T-1824 in cardiovascular system of, 633\*  
 Basal metabolism, treatment of angina pectoris by reduction of, 791\*  
 Bifurcation of aorta, embolism at (Morest and Rubin), 277  
 Bile, excretion of blue dye, T-1824, in, 632\*  
 Biochemical and hemodynamic changes following subcutaneous injection of glucose solution, 308\*  
 Blalock-Taussig operation, analysis of malformations of heart amenable to (Taussig), 321  
 Blood cholesterol level, relationship between dietary composition and (Wilkinson, Jr., et al.) (Proc.), 472  
   composition of, influence of environmental temperature and posture on volume and, 153\*  
   constituents, certain, influence of thyroid status on electrocardiogram and, of sheep, 785\*  
   flow, coronary, and cardiac oxygen metabolism, effect of nikethamide on, 156\*  
     through vessels in vein walls, effects of venous endothelium on alterations in, and possible relation to thrombosis, 462\*  
   plasma, correlation between effect of quinine sulfate on heart and its concentration in, 793\*  
   platelets, observations on part played by vasoconstrictor substance of, in mechanism of vascular spasm, 307\*  
   pressure, basal, effect of thiocyanate on, 791\*  
     effect of tetraethylammonium chloride on, before and after sympathectomy for hypertension, 793\*  
     leucocyte concentration, smooth and cardiac muscle activity: physiological effects of plasma protein, 152\*  
     recording of, from left auricle and pulmonary veins in human subjects with interauricular septal defects, 151\*

## Blood Pressure—Cont'd

- systemic, as factor in absorption of saline from small intestine, 152\*  
   studies on cholesterol content of coronary arteries and, in acute coronary thrombosis (Morrison et al.) (Proc.), 474  
   volume and right atrial pressure, effect of increasing, on circulation of normal subjects by intravenous infusions, 455\*  
   circulatory corpuscle and, in case of patent ductus arteriosus before and after ligation, 150\*  
   studies of, in tetralogy of Fallot and in other types of congenital heart disease, 308\*  
 Blue dye, T-1824, excretion of, in bile, 632\*  
 Bradycardia, extreme (Doane and Krasnoff), 777  
 Bronchiogenic carcinoma, undiagnosed, case report of mechanical right heart failure from extension of, 312\*  
 Bundle branch block, human, effect of posture upon axis deviation in (Jones and Feil), 739  
   on axis deviation in (Jones and Feil), 98  
   right, in human heart, new contributions to study of intracavity potential in cases of (Sodi-Pallares et al.), 1  
   lateral, right, histologic demonstration of: septal infarction with complete heart block and intermittent anomalous atrioventricular excitation (Wolff-Parkinson-White syndrome) (Levine and Burge, Jr.), 431

## C

- Calcification of myocardium, 302\*  
 Calcifications, cardiac annular and valvular (leaflet), 794\*  
   roentgen demonstration of, in interventricular septum in cases of heart block, 309\*  
 Calcium, effect of, on cardiovascular stimulation produced by acetylcholine, 793\*, 953\*  
 Canal, atrioventricular, incomplete division of, with patent interatrial foramen primum (persistent common atrioventricular ostium) (Rogers and Edwards), 28  
 Capillaries, cerebral, alterations of, in early stage of arterial hypertension, 784\*  
 Carcinoma, bronchiogenic, undiagnosed, case report of mechanical right heart failure from extension of, 310\*  
 Cardiac acceleration during anoxia, on cause of, 946\*  
   and respiratory adjustments in chronic anemia, clinical significance of, 795\*  
   apex formed by right or left ventricular myocardium, identical electrocardiograms with, 949\*  
   disease, congenital, (Fallot's tetralogy), complication of; cerebral abscess, 301\*  
   dynamics, endo-sinusal hypotension and, in sympathectomized and in completely denervated heart of dogs (III); heart and carotid sinus, 946\*

- Cardiac—Cont'd  
 lesions of acute disseminated lupus erythematosus, 786\*  
 output and oxygen consumption in dogs, endocrine influences on, 633\*  
   of dog, effects of muscle trauma and of hemorrhage upon, 632\*  
   role of carotid sinus and cardio-aortic region in reflex regulation of, 949\*  
 resuscitation, 947\*
- Cardio-aortic region, role of carotid sinus and, in reflex regulation of cardiac output, 949\*
- Cardiotoxic lesions of digitalis in dog, further studies on effect of papaverine upon (Kyser and Trump), 133
- Cardiovascular disorder with peripheral neuritis, six cases of, 310\*  
 reflex, carotid sinus, decussation of pathways in: example of principle of convergence, 460\*  
   mechanism, carotid sinus, analysis of, 461\*  
 system as effector organ in psychosomatic phenomena, 943\*  
   of barbitalized dogs, mixing of cells, plasma, and dye T-1824 in, 633\*
- Carditis, allergic, pericarditis, and pleurisy, 456\*
- Caronamide: plasma concentrations, urinary recoveries, and dosage, 955\*
- Carotid sinus and cardio-aortic region, role of, in reflex regulation of cardiac output, 949\*  
   cardiovascular reflex, decussation of pathways in: example of principle of convergence, 460\*  
   mechanism, analysis of, 461\*  
   heart and; II and III, 946\*  
   stimulation, hemiplegia following (Brannon), 299
- Caudal anesthesia, spinal and, in hypertension, circulatory responses to: relation to effect of sympathectomy; I. Effect on arterial pressure (Taylor et al.), 221  
   II. Effect on renal function (Corcoran et al.), 226
- Cellophane treatment of syphilitic aneurysms with report of results in six cases (Poppe), 252
- Cerebral abscess; complication of congenital cardiac disease (Fallot's tetralogy), 301\*  
   capillaries, alterations of, in early stage of arterial hypertension, 784\*  
   hemorrhage following repair of common carotid-internal jugular arteriovenous fistula, 789\*  
   swelling, hypertensive, characteristic clinicopathologic syndrome, 457\*  
   vascular changes in arterial hypertension (Scheinker) (Proc.), 470
- Chest leads, multiple, in myocardial infarction, diagnostic value of pattern  $T_1$  lower than  $T_3$  ( $T_1 < T_3$ ) compared with information yielded by (Dressler and Roesler), 115
- Chest—Cont'd  
 pain, atypical, experience with "anoxemia test" in patients with angina pectoris and in those with (Stewart et al.), 161
- Childhood, first ten years of rheumatic infection in (Ash), 89
- Cholecystectomy for relief of anginal pain in patient with cholelithiasis, coronary occlusion with myocardial infarction following (Roth), 939
- Cholelithiasis, coronary occlusion with myocardial infarction following cholecystectomy for relief of anginal pain in patient with (Roth), 939
- Cholesterol and thiouracil feeding, further studies on production of arteriosclerosis in dogs by (Steiner et al.) (Proc.), 477  
   atherosclerosis, experimental, inhibition of, by alloxan diabetes in rabbit (Duff and McMillan) (Proc.), 469  
   blood, clinical significance of (Ungerleider and Gubner) (Proc.), 474  
   disorders, effect of, on coronary arteries and aorta (Morrison and Gonzales) (Proc.), 473  
   levels, changes in, in patients with coronary occlusion following choline therapy (Morrison et al.) (Proc.), 474  
   colloidal, development of atheromatous plaques following production of intimal atherosclerosis by intravenous infusions of, into rabbits (Bevans et al.) (Proc.), 473  
   content of coronary arteries and blood in acute coronary thrombosis, study on (Morrison et al.) (Proc.), 474  
   level, blood, relationship between dietary composition and (Wilkinson, Jr., et al.) (Proc.), 472  
   some aspects of intermediary metabolism of (Bloch) (Proc.), 471
- Choline feeding, absorption of aortic atherosclerosis by (Morrison and Rossi) (Proc.), 479  
   feedings, prevention of experimental atherosclerosis by (Morrison and Rossi) (Proc.), 479  
   therapy, changes in blood cholesterol levels in patients with coronary occlusion following (Morrison et al.) (Proc.), 474
- Chorea, Sydenham's syndrome for differential diagnosis, 154\*
- Circulation, collateral, of normal human heart by coronary perfusion with radioactive erythrocytes and glass spheres, studies on, 790\*  
   new method for study of: radiocardiography (Prinzmetal et al.) (Proc.), 476  
   some effects of quinidine sulfate on heart and, in man (Ferrer et al.), 816  
   time and fractionation of vascular bed traversed, use of acetylcholine in objective determination of, 153\*

- Circulatory changes, renal and cardiac, influence of sulfhydryl compounds on diuresis and, caused by mersalyl, 452\*
- investigations resulting from drugs which paralyze sympathetic system. I. Ergotamine (Gynergen), 787\*
- responses to spinal and caudal anesthesia in hypertension: relation to effect of sympathectomy. I. Effect on arterial pressure (Taylor et al.), 221
- II. Effect on renal function (Corcoran et al.), 226
- Circus movement, discussion of; proof of its occurrence in clinical auricular flutter, 635\*
- Conduction defects, intraventricular, 944\*
- intraventricular, supernormal phase of (Scherf and Scharf), 621
- Convergence, example of principle of: decussation of pathways in carotid sinus cardiovascular reflex, 460\*
- Convulsions, electrically induced, mechanisms underlying pulmonary and cardiac complications of, 788\*
- Coronary arteries and aorta, effect of blood cholesterol disorders on (Morrison and Gonzales) (Proc.), 473
- and blood, studies on cholesterol content of, in acute coronary thrombosis (Morrison et al) (Proc.), 474
- aneurysm of (Scott), 403
- nonatheromatous lesions of: progress of medical science, 303\*
- of dog, reactions of, following injury by allylamine (Waters and McAllister) (Proc.), 475
- in men eighteen to thirty-nine years of age (Yater et al.), 334, 481, 683
- insufficiency, apparent, ergotamine and, 629\*
- stress and electrocardiogram in induced hypoxemia test for (Burchell et al.), 373
- occlusion, acute, experimental, effect of Dicumarol on heart in (Blumgart et al.), 13
- following choline therapy, changes in blood cholesterol levels in patients with (Morrison et al.) (Proc.), 474
- study of alleged intercoronary reflexes following (Opdyke and Selkurt), 73
- with myocardial infarction following cholecystectomy for relief of anginal pain in patient with cholelithiasis (Roth), 939
- thrombosis, hypertension and (Paterson and Holmes) (Proc.), 470
- with myocardial infarction, report of committee for evaluation of anticoagulants in treatment of (Wright, et al.), 801
- venous blood, oxygen content of, as affected by anoxia and cytochrome C (Eckenhoff and Hafkenschiel), 893
- Corpuscle, circulatory, and blood volume in case of patent ductus arteriosus before and after ligation, 150\*
- Cyclopropane-epinephrine tachycardia, further studies on production of, 311\*
- Cytochrome C, effect of, upon metabolism of rat tissue, 155\*
- oxygen content of coronary venous blood as affected by anoxia and (Eckenhoff and Hafkenschiel), 893
- D
- Dental extraction, effect of penicillin on bacteremia following, 302\*
- Dextrocardia and septal defects, 949\*
- with situs inversus, interpretation of electrocardiogram in (Shepard and Stewart), 55
- Dextrocardiogram, levo- and, determination of (Segers), 751
- Diabetes, alloxan, inhibition of experimental cholesterol atherosclerosis by, in rabbit (Duff and McMillan) (Proc.), 469
- Dicumarol, effect of, on heart in experimental acute coronary occlusion (Blumgart et al.), 13
- poisoning, 454\*
- therapy in seventy-five consecutive cases, detailed study of: acute myocardial infarction (Greisman and Marcus), 600
- use of anticoagulants in surgery of aneurysms and arteriovenous fistulas, with particular reference to, 301\*
- Diet and renal insufficiency, studies on relationship of, to arterial disease (Holman) (Proc.), 476
- Dietary composition and blood cholesterol level, relationship between (Wilkinson, Jr., et al.) (Proc.), 472
- Digitaline native, digitoxin, amount of, required for adequate digitalization (Stewart and Newman), 641
- Digitalis action, on mechanism of, 950\*
- further studies on effect of papaverine upon cardiotoxic lesions of, in dog (Kyser and Trump), 133
- glycosides, further experiments in attempt to locate site of emetic action of, 156\*
- influence of muscular exercise on tolerance of, in guinea pigs, 948\*
- on behavior of serum cholinesterase in cardiac patients treated with, 309\*
- toxicity, hitherto undescribed neurological manifestations of (Batterman and Gutner), 582
- Digitoxin (Digitaline native), amount of, required for adequate digitalization (Stewart and Newman), 641
- Diphtheria, fatal, myocardial changes in, 953\*
- Diphtheritic myocarditis, complete atrioventricular block in, 786\*
- Diuresis and renal and cardiac circulatory changes caused by mersalyl, influence of sulfhydryl compounds on, 452\*, 950\*
- Diuretic action of formoguanamine in normal persons, 792\*, 952\*

## E

- Edema, uremic, of lungs, 310\*
- Electric shock, ventricular fibrillation of long duration abolished by, 156\*
- Electrical effects of injury at various myocardial locations (Hellerstein and Katz), 184  
manometer, portable, suitable for continuous indication of peripheral venous pressures (Pollack and Wood), 899
- Electrically induced convulsions, mechanisms underlying cardiac complications of, 788\*
- Electrocardiogram and certain blood constituents of sheep, influence of thyroid status on, 785\*  
can longitudinal anatomical axis of ventricles be estimated from? (Hyman et al.), 906  
evaluation of precordial leads of, in obesity (Jaffe et al.), 911  
in mitral stenosis with special regard to its development, 461\*  
interpretation of, in dextrocardia with situs inversus (Shepard and Stewart), 55  
of dog, effect of intravenous procaine on (Uhley and Wilburne), 576  
precordial, experimental study of acute pulmonary arterial obstruction with special reference to (Flasher et al.), 882  
stress and, in induced hypoxemia test for coronary insufficiency (Burchell et al.), 373

- Endothelium, venous, effects of, on alterations in blood flow through vessels in vein walls, and possible relation to thrombosis, 462\*
- Ergotamine and apparent coronary insufficiency, 629\*  
(Gynergen) (I); circulatory investigations resulting from drugs which paralyze sympathetic system, 787\*
- Erythrocytes, radioactive, and glass spheres, studies on collateral circulation of normal human heart by coronary perfusion with, 790\*
- Ether, pulmonary and cerebral fat embolism following intravenous administration of, therapeutically, 458\*
- Evans blue, combination of, with plasma protein: its significance in capillary permeability studies, blood dye disappearance curves, and its use as protein tag, 632\*
- Excitation, atrioventricular, anomalous, intermittent, (Wolff-Parkinson-White syndrome), septal infarction with complete heart block and: histologic demonstration of right lateral bundle (Levine and Burge, Jr.), 431
- Extrasystoles, auricular and ventricular, first heart sound in, 630\*
- Extremities, lower, in infants, gangrene of (Richter and Tainsky), 443  
of normal individuals, maintenance of vasodilation of, for prolonged period by ingestion of two to four substantial meals in close succession, 785\*

## F

- Faintness and syncope in semi-starved individual, problem of, cardiovascular response to posture and, 785\*
- Fat-depositing mechanism, further studies on (Sims et al.) (Proc.), 469

- Fat embolism, pulmonary and cerebral, following intravenous administration of ether therapeutically, 458\*  
 low, diet, effect of, on spontaneously occurring arteriosclerosis of chicken (Horlick et al.) (Proc.), 472  
 Fibrillation, auricular, chronic, 314\*  
 experimental studies on auricular flutter and (Scherf et al.), 241  
 pre-excitation and, 461\*  
 Fistulas, arteriovenous, aneurysms and, use of anticoagulants in surgery of, with particular reference to Dicumarol, 301\*  
 Fluid volumes, available and interstitial, of normal children, 634\*  
 Flutter, auricular, and auricular fibrillation, experimental studies on (Scherf et al.), 241  
 Foramen primum, interatrial, patent, (persistent common atrioventricular ostium) incomplete division of atrioventricular canal with (Rogers and Edwards), 28  
 Formoguanamine, diuretic action of, in normal persons, 792\*, 952\*  
 Fractionation, circulation time and, of vascular bed traversed, use of acetylcholine in objective determination of, 153\*

## G

- Gangrene of lower extremities in infants (Richter and Tainsky), 443  
 Glass spheres, studies on collateral circulation of normal human heart by coronary perfusion with radioactive erythrocytes and, 790\*  
 Glomerulonephritis, acute and subacute, myocarditis associated with (Gore and Saphir), 390  
 Glomerulosclerosis, intercapillary, glomerular lipoidosis in (Wilens et al.) (Proc.), 478  
 Glucose solution, biochemical and hemodynamic changes following subcutaneous injection of, 308\*  
 Glycosides, cardiac, certain, effect of, on serum cholinesterase, 945\*  
 determination of therapeutic irregularity and lethal doses of, in heart-lung preparation of dog, 452\* 950\*

## H

- Heart, analysis of malformations of, amenable to Blalock-Taussig operation (Tausig), 321  
 and carotid sinus; II and III, 946\*  
 and circulation, some effects of quinidine sulfate on, in man (Ferrer et al.), 816  
 and pericardium, further observations of penetrating wounds of, 311\*  
 block, auriculoventricular, mechanism of irregular sinus rhythm in (Roth and Kisch), 257  
 complete and intermittent anomalous atrioventricular excitation (Wolff-Parkinson-White syndrome), septal

## Heart block—Cont'd

- infarction with: histologic demonstration of right lateral bundle (Levine and Burge, Jr.), 431  
 roentgen demonstration of calcifications in interventricular septum in cases of, 309\*  
 completely denervated, of dogs, endo-sinusal hypotension and cardiac dynamics in sympathectomized, and in (III); heart and carotid sinus, 946\*  
 conditions, acute, sudden, abdominal symptoms in, 306\*  
 disease, congenital, continuous observations of arterial oxygen saturation at rest and during exercise in (Montgomery, Jr., et al.), 668  
 clinical study on relative incidence of, 150\*  
 studies of blood volume in tetralogy of Fallot and in other types of, 308\*  
 incidence of, in 2,000 consecutive autopsies, 317\*  
 effect of Dicumarol on, in experimental acute coronary occlusion (Blumgart et al.), 13  
 failure, case of reversible papilloedema due to, 454\*  
 hypertensive, tetraethyl ammonium bromide in hypertension and, 453\*  
 postpartal, acute, 312\*  
 right, mechanical, from extension of undiagnosed bronchiogenic carcinoma, case report of, 312\*  
 human, new contributions to study of intracavity potential in cases of right bundle branch block in (Sodi-Pallares et al.), 1  
 ligation and division of abdominal aorta for metallic embolus from, 950\*  
 muscle, electrical characteristics of injuries to, 153\*  
 neoplastic metastasis to (Lefkovits), 610  
 occult injuries to, 316\*  
 removal of foreign bodies from pericardium and; moving picture demonstration, 947\*  
 sound, first, in auricular and ventricular extrasystoles, 630\*  
 spontaneous rupture of papillary muscle of, 955\*  
 studies of venous drainage of, 631\*  
 Heart-lung preparation of dog, determination of therapeutic irregularity and lethal doses of cardiac glycosides in, 452\*, 950\*  
 Hemangioma, cavernous, of lung, 956\*  
 Hemiplegia following carotid sinus stimulation (Brannon), 299  
 transient, following electroconvulsive treatment, 952\*  
 Hemodynamic changes, biochemical and, following subcutaneous injection of glucose solution, 308\*  
 Hemorrhage, effects of muscle trauma and of, upon cardiac output of dog, 632\*  
 Herapin, action of, on experimental venous thrombosis, 312\*  
 in treatment of toxemia of pregnancy, 790\*

- Hepatic vein catheterization flow in pregnancy, 155\*
- Hyperglycemia, adrenalin induced, effect of anoxia on, 150\*
- Hypertension and allied cases, sympathetic nerve block in, 306\*
- and coronary thrombosis (Paterson and Holmes) (Proc.), 470
- and hypertensive heart failure, tetraethyl ammonium bromide in, 453\*
- and unilateral kidney disease, 306\*
- and urologic disease, 943\*
- arterial alterations of cerebral capillaries in early stage of, 784\*
- cerebral vascular changes in (Scheinker) (Proc.), 470
- circulatory responses to spinal and caudal anesthesia in: relation to effect of sympathectomy. I. Effect on arterial pressure (Taylor et al.), 221
- II. Effect on renal function (Corcoran et al.), 226
- effect of tetraethylammonium chloride on blood pressure before and after sympathectomy for, 793\*
- essential, clinical evaluation of veratrum viride in treatment of (Freis and Stanton), 723
- sympathectomy in, 946\*
- treatment of, with vitamin K, 945\*
- experimental, effect of pregnancy on course of, 634\*
- fifty-four deaths occurring in pregnant patients who had, 795\*
- heredity in, 459\*
- hormonal, and nephrosclerosis as influenced by diet, 956\*
- paroxysmal, due to chromaffin adrenal tumor, electrocardiographic changes in, 150\*
- Hyperthermia caused by penicillin-heparin in treatment of subacute bacterial endocarditis, 790\*
- Hypotension, endo-sinusal, and right ventricular pressure (II); heart and carotid sinus, 946\*
- Hypoxemia test, induced, for coronary insufficiency, stress and electrocardiogram in (Burchell et al.), 373
- I
- Iliofemoral thrombophlebitis, nontraumatic, bilateral, in child (Myers and Artsis), 295
- Infancy, cardiac murmurs in, 787\*
- Infant, newborn, myocardial infarction in, 154\*
- Infants, gangrene of lower extremities in (Richter and Tainsky), 443
- Infarction, anteroseptal, correlation of electrocardiographic and pathologic findings in (I) (Myers et al.), 535
- atrial, with diagnostic electrocardiographic findings (Hellerstein), 422
- myocardial, acute: detailed study of Dicumarol therapy in seventy-five consecutive cases (Greisman and Marcus), 600
- Infarction, myocardial—Cont'd
- and angina pectoris during serum sickness, 151\*
- diagnostic value of pattern  $T_1$  lower than  $T_3$  ( $T_1 < T_3$ ) compared with information yielded by multiple chest leads in (Dressler and Roesler), 115
- recurrent spontaneous mediastinal emphysema simulating (Pellegrino and Silber), 447
- septal, with complete heart block and intermittent anomalous atrioventricular excitation (Wolff-Parkinson-White syndrome): histologic demonstration of right lateral bundle (Levine and Burge, Jr.), 431
- Infarcts, anterolateral, large, correlation of electrocardiographic and pathologic findings in (II) (Myers et al.), 838
- Infection, rheumatic, in childhood, first ten years of (Ash), 89
- Insufficiency, coronary, stress and electrocardiogram in induced hypoxemia test for (Burchell et al.), 373
- Interatrial foramen primum, patent (persistent common atrioventricular ostium), incomplete division of atrioventricular canal with (Rogers and Edwards), 28
- Interauricular and interventricular septal defects, congenital tricuspid atresia associated with, (Miale et al.), 438
- septal defects, recording of blood pressure from left auricle and pulmonary veins in human subjects with, 151\*
- Inter coronary reflexes, alleged, following coronary occlusion, study of (Opdyke and Selkurt), 73
- Interventricular septal defects, interauricular and, congenital tricuspid atresia associated with (Miale et al.), 438
- septum, in cases of heart block, roentgen demonstration of calcifications in, 309\*
- Intracavity potential, new contributions to study of, in cases of right bundle branch block in human heart (Sodi-Pallares et al.), 1
- Intravenous infusions, effect of increasing blood volume and right atrial pressure on the circulation of normal subjects by, 455\*
- Intraventricular conduction, supernormal phase of (Scherf and Scharf), 621
- K
- Kidney disease, unilateral, hypertension and, 306\*
- K-strophanthin, significance of speed of injection for therapeutic effect of, 944\*
- Kymographic studies of function of auricle, 949\*
- L
- Leads, precordial, of electrocardiogram in obesity, evaluation of (Jaffe et al.), 911

Leucocyte concentration, blood pressure, and smooth and cardiac muscle activity: physiological effects of plasma protein, 152\*

Levo- and dextrocardiogram, determination of (Segers), 751

Limbs, arteriography of, 154\*

Lipoidosis, glomerular, in intercapillary glomerulosclerosis (Wilens et al.) (Proc.), 478

Liver blood flow in pregnancy—hepatic vein catheterization, 155\*

spleen, and lungs, arteriovenous anastomoses in, 784\*

Longitudinal anatomical axis of ventricles, can it be estimated from electrocardiogram? (Hyman et al.), 906

Lumbar ganglionectomy in peripheral arteriosclerosis (Gerber et al.) (Proc.), 478

Lung, cavernous hemangioma of, 956\*

Lungs, arteriovenous anastomoses in liver, spleen, and, 784\*

uremic edema of, 310\*

Lupus erythematosus and allied conditions, pathogenesis of, 785\*

disseminated, acute, cardiac lesions of, 786\*

M

Malaria tertiana, myocardial affection in, 154\*

Manometer, electrical, portable, suitable for continuous indication of peripheral venous pressures (Pollack and Wood), 899

Men eighteen to thirty-nine years of age, coronary artery disease in (Yater et al.), 334, 481, 683

Mersalyl, influence of sulfhydryl compounds on diuresis and renal and cardiac circulatory changes caused by, 452\*, 950\*

Metabolism, intermediary, of cholesterol, some aspects of (Bloch) (Proc.), 471

of rat tissue, effect of cytochrome C upon, 155\*

oxygen, cardiac, effect of nikethamide on coronary blood flow and, 156\*

Metastasis, neoplastic, to heart (Lefkovits), 610

Mitral stenosis, electrocardiogram in, with special regard to its development, 461\*

valve, true aneurysms of, in subacute bacterial endocarditis, 304\*

Murmurs, cardiac, in infancy, 787\*

Muscle activity, smooth and cardiac, blood pressure, leucocyte concentration, and: physiological effects of plasma protein, 152\*

auricular, of turtle, augmentation of effects of vagal stimulation upon, by veratrine and sulfocyanate, 945\*

cardiac, hypersensitivity of, to potassium ion following administration of veratrine and sulfocyanate after complete atropinization, 945\*

mammalian, effects of anoxic anoxia on excitability, conduction, and refractoriness of, 152\*

Muscle, heart—Cont'd

heart, electrical characteristic of injuries to, 153\*

papillary, of heart, spontaneous rupture of, 955\*

trauma, effects of, and of hemorrhage upon cardiac output of dog, 632\*

Muscular exercise, influence of, on tolerance of digitalis in guinea pigs, 948\*

Myocardial affection in malaria tertiana, 154\*

changes in fatal diphtheria, 953\*

infarction, acute: detailed study of Dicumarol therapy in seventy-five consecutive cases (Greisman and Marcus), 600

coronary occlusion with, following cholecystectomy for relief of anginal pain in patient with cholelithiasis (Roth), 939

diagnostic value of pattern  $T_1$  lower than  $T_3$  ( $T_1 < T_3$ ) compared with information yielded by multiple chest leads in (Dressler and Roesler), 115

electrocardiographic and clinical studies on certain types of: supra-apical, endocardial, epicardial, lateral, and anterolateral infarction, 629\*

in newborn infant, 154\*

recurrent spontaneous mediastinal emphysema simulating (Pellegrino and Silber), 447

report of committee for evaluation of anticoagulants in treatment of coronary thrombosis with (Wright et al.), 801

locations, various, electrical effects of injury at (Hellerstein and Katz), 184

Myocarditis associated with acute and subacute glomerulonephritis (Gore and Saphir), 390

diphtheritic, complete atrioventricular block in, 786\*

interstitial, diffuse, in case of epidemic encephalitis, 458\*

rheumatic, latent, 157\*

typhoid, electrocardiographic study of, 944\*

virus, 783\*

Myocardium after sulfonamide therapy, 304\*

calcification of, 302\*

ventricular, right or left, identical electrocardiograms with cardiac apex formed by, 949\*

## N

Nephrosclerosis, hormonal hypertension and, as influenced by diet, 956\*

Nerve block, sympathetic, in hypertension and allied cases, 306\*

Neuritis, peripheral, six cases of cardiovascular disorder with, 310\*

Neurological manifestations, hitherto undescribed, of digitalis toxicity (Batterman and Gutner), 582

Niacin treatment, electrocardiographic changes in typhoid fever and their reversibility following (Rachmilewitz and Braun), 284

Nikethamide, effect of, on coronary blood flow and cardiac oxygen metabolism, 156\*

## O

- Obesity, evaluation of precordial leads of electrocardiogram in (Jaffe et al.), 911
- Occlusion, arterial, mesenteric, superior,—recovery without resection, 787\*
- coronary, acute, experimental, effect of Dicumarol on heart in (Blumgart et al.), 13
- study of alleged intercoronary reflexes following (Opdyke and Selkurt), 73
- Oxygen, arterial, saturation at rest and during exercise in congenital heart disease, continuous observations of (Montgomery, Jr., et al.), 668

- venous, experimental, action of heparin on, 312\*
- Thrombotic obliteration of aortic bifurcation, syndrome of, 951\*
- Thyroid function in older individuals with various degrees of arteriosclerosis, evaluation of (Kountz et al.) (Proc.), 475
- status, influence of, on electrocardiogram and certain blood constituents of sheep, 785\*
- Toxemia of pregnancy, heparin in treatment of, 790\*
- nine-year follow-up in cases of, 790\*
- Toxicity, digitalis, hitherto undescribed neurological manifestations of (Batterman and Gutner), 582
- Tumor, adrenal, chromaffin, electrocardiographic changes in paroxysmal hypertension due to, 150\*
- Typhoid fever, electrocardiographic changes in, and their reversibility following niacin treatment (Rachmilewitz and Braun), 284
- myocarditis, electrocardiographic study of, 944\*
- U
- Ulcer, duodenal, partial A-V block and, 948\*
- Urologic disease, hypertension and, 943\*
- Urticaria, severe, obliterating arterial disease of upper extremity following, 151\*

## V

- Vagal stimulation, augmentation of effects of, upon auricular muscle of turtle by veratrine and sulfacyanate, 945\*
- Vagus nerve, cardiac, excised frog and terrapin, effects of analgesic drugs upon, 950\*  
reaction of peripheral vascular system of dog to stimulation of central end of, 946\*
- Varicose ulcer, treatment of, 954\*  
veins, new test in diagnosis and surgical treatment of, 953\*
- Vascular changes, cerebral, in arterial hypertension (Scheinker) (Proc.), 470  
disease, hypertensive, diagnosis and natural history of, 457\*  
treatment of, with rice diet, 794\*
- obstruction, pulmonary, widespread, hitherto unrecognized tendency to development of, in patients with congenital pulmonary stenosis (tetralogy of Fallot), 458\*
- spasm, observations on part played by vasoconstrictor substance of blood platelets in mechanism of, 307\*
- system, peripheral, of dog, reaction of, to stimulation of central end of vagus nerve, 946\*
- Vasodilation of extremities of normal individuals for prolonged period by ingestion of two to four substantial meals in close succession, maintenance of, 785\*
- Vasopressor activity of some new orally active sympathomimetic amines, 943\*
- Venous blood, coronary, oxygen content of, as affected by anoxia and cytochrome C (Eckenhoff and Hafkenschiel), 893  
drainage, of heart, studies of, 631\*

## Venous—Cont'd

- pressures, effective, regional intrathoracic pressures and their bearing on calculation of, 631\*
- peripheral, portable electrical manometer suitable for continuous indication of (Pollack and Wood), 899
- Ventricles, can longitudinal anatomical axis of, be estimated from electrocardiogram (Hyman et al.), 906
- Ventricular fibrillation of long duration abolished by electric shock, 156\*
- septal defect, high, with slight dextroposition of aorta (Eisenmenger type) which presented clinical features of patent ductus arteriosus (Hurst and Schemm), 144
- tachycardia, paroxysmal, with special reference to treatment, 636\*
- Veratrine and sulfocyanate, augmentation of effects of vagal stimulation upon auricular muscle of turtle by, 945\*  
hypersensitivity of cardiac muscle to potassium ion following administration of, after complete atropinization, 945\*
- Veratrum viride in treatment of essential hypertension, clinical evaluation of (Freis and Stanton), 723
- Virus myocarditis, 783\*
- Vitamin E in angina pectoris, 788\*  
K, treatment of essential hypertension with, 945\*

## W

- Wolff-Parkinson-White syndrome, 308\*
- Women, further experience with thromboangitis obliterans in (Silbert), 757
- Wounds, penetrating, of heart and pericardium, further observation on, 311\*
